SHORT COURSES ON OFFER IN NOVEMBER 2019

Facilitator: Mr. Sioni Likela
Sustainable Development Advisory Councilor: MET
Senior Fisheries Research Technician: MFMR

INTRODUCTION TO ENVIRONMENTAL IMPACTS ASSESSMENT
04th to 08th November 2019 | IUM, Dorado Main Campus, Windhoek
Form(s) of tuition: Lectures, discussions, group work, games
Form(s) of assessment: Short essay (1500 words), Presentations
Course fee per participant: N$ 4500

Themes to be covered:
- Introduction to Environmental Management Act of 2007
- Screening
- Scoping
- Assessment and evaluation of impacts and development of alternatives.
- Reporting the Environmental Impact Statement (EIS) or EIA report.
- Decision-making process.
- Monitoring, compliance, enforcement and environmental auditing.
- Strategic Environmental Assessment

Why You Should Attend:
At the end of the course, participants should be able to demonstrate the following:
- Identify circumstances under which a full EIA or Basic Environmental Assessment is required based on Namibian Environmental Management Act 2007 and other legislation.
- Compile the application form required for the Department of Environmental Affairs.
- Compile the basic assessment report required for the Department of Environmental Affairs.
- Identify the key steps required in a full screening and EIA process.
- Discuss the importance of and best practice for public participation during the EIA process.
- Discuss the Terms of Reference for a specialist study.
- Discuss the importance of Environmental Management Plans (EMP).
- Discuss what procedures can be followed after environmental authorization is granted.
- Critically evaluate the merits of an EIA – what makes a good EIA.

Closing date: 31 October 2019

SOLID WASTE MANAGEMENT
11th to 15th November 2019 | IUM, Dorado Main Campus, Windhoek
Form(s) of tuition: Lectures, discussions, group work, games
Form(s) of assessment: Short essay (1500 words), Presentations
Course fee per participant: N$ 4500

Themes to be covered:
- Introduction to Solid Waste Management
- Waste Collection & Transport
- Treatment and Disposal Technologies
- Integrated Waste Management Plan
- Waste generation
- Onsite handling, storage, and processing
- Waste transfer
- Waste processing and recovery
- Sustainable Solid Waste Management

Why You Should Attend:
At the end of the course, participants should be able to demonstrate the following:
- To identify options for waste reduction at source so as to reduce quantities of waste generated;
- To choose from an array of options to turn waste into economic goods;
- To suggest treatment/disposal methods for waste from which the value has been taken out and to make basic calculations related to the conceptual design thereof;
- To assess the impact of waste and other environmental management on other environmental compartments;
- To conceptually develop a solid waste management scheme for an urban area;
- To formulate and implement the sustainable solid waste management practices;
- To reduce and avoid adverse impacts caused by unnecessary waste generation and improper waste management practices;
- To promote and encourage effective waste minimization and waste management practices as per Waste Management Hierarchy of their respective areas of jurisdiction;

Closing date: 31 October 2019

WORKSHOP ON FUNDAMENTALS OF ENTREPRENEURSHIP
